

Fighting microplastics

GKD: partner of a research project focusing on the environmental impact of tire wear

WORLD WIDE WEAVE

Picture 1: In the research project *Tire debris in the environment*, GKD as a leading mesh specialist, is in demand for the design and development of a suitable mesh for the filter bowls.

Picture 2: Over 110,000 tons of tire wear debris per year are created in Germany. In cooperation with well-known project partners, GKD investigates effective preventive strategies in the framework of the research project *Tire debris in the environment*.

Picture 3: At the start of the project, the Parliamentary State Secretary Thomas Rachel handed over a check for approximately €185,000 to Dr. Stephan Kufferath, CEO of GKD.
