

# Airport architecture: Ready for take off

## New design horizons with metal fabric

WORLD WIDE WEAVE

Picture 1: For the parking garage façade at Terminal II of Cologne Bonn Airport GKD metal fabric was used for the first time in the mid 1990s as cladding.

Picture 2: 2,500 square meters of LAGO fabric from GKD encapsulate the parking garage at Van Nuys Airport in Los Angeles.

Picture 3: At Adelaide Airport in Australia, 2,000 square meters of TIGRIS stainless steel fabric from GKD were used for the extended and slanted façade of the path connecting the terminal with the parking garage.

Picture 4: Madrid Barajas encapsulated two control towers with 1,600 square meters of ESCALE 7x1 stainless steel fabric from GKD.

Picture 7: For the sweeping ceiling construction in the reception area of the Hilton Frankfurt Airport Hotel, the architects chose the sophisticated MANDARIN bronze metal fabric from GKD.

Picture 8: At Dubai International Airport, GKD metal fabric was used as cladding for the columns that stretch across multiple floors.

Picture 9: At Muscat International Airport, wall hangings made of LAMELLE fabric from GKD and measuring up to 7.5 meters high visually upgrade the retail area.

## New design horizons with metal fabric

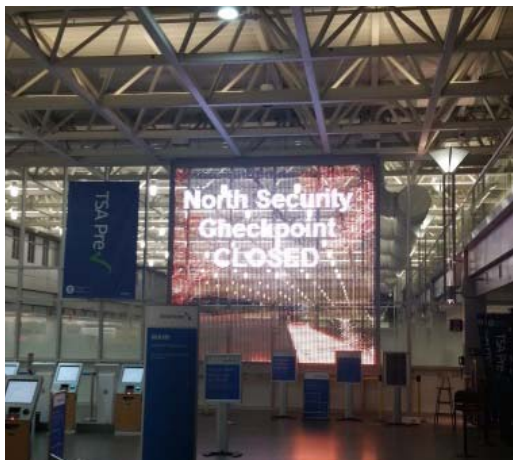

WORLD WIDE WEAVE

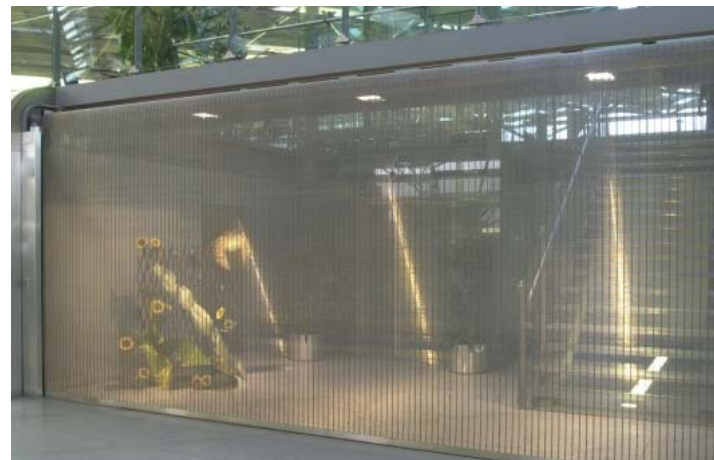

Picture 10: At New Doha International Airport in Qatar, four MEDIAMESH® screens from GKD in Hall C of the main terminal demonstrate their power as attention-grabbing advertising platforms for luxury goods from across the globe.

Picture 11: A mixed media screen at Muscat International Airport combines the transparent MEDIAMESH® and ILLUMESH media façade systems.

Picture 12: Two MEDIAMESH® screens installed at Minneapolis-St. Paul International Airport demonstrate their effectiveness as a signposting system.

Picture 13: Roll-up systems made of high-grade architectural mesh open up attractive design options thanks to their combination of high transparency and rugged resilience.
